Dr. K. Madeswaran M.Ch (Neuro Surg).,
Chairman, Consultant Neuro & Spine Surgeon
Royal Care Super Speciality Hospitals.

Dr.K.Madeswaran is the first generation graduate and doctor from his family and completed his MBBS from M/S. Ramaiah Medical College. While serving as a Primary Health Center Doctor, he continued to pursue his aim to be a Neuro surgeon and got into Madurai Medical College in the year 1997 to the direct 5 year MCh course.

A go-getter by nature, he came out in flying colours in the year 2002 as the best outgoing student. Being a Neuro surgeon only strengthened his commitment to serve and he joined the government service to continue as an assistant professor in Neuro surgery at Madurai Medical College. He was instrumental in starting the Madurai Neuro surgical Academy which still continues to function as one of the prestigious societies for education and research in Neuro surgery. After serving for more than 3 years, he went on to join the corporate sector to be known as one of the leading Neurosurgeons today.

Operating more than 10,000 cases in Neuro and Spine surgery being no small achievement, he developed special interest in Tumour surgery and is acknowledged by all as one of the well acclaimed specialists in this complex field. He has to his credit more than 3000 tumour surgeries which is a big number by all means.

He has several research papers to his credit some of which have been published in International Journals. One of his research article has also been quoted in the Textbook of Neurosurgery by Prakash Narain Tandon, Ravi Ramamurthi which is one of the prescribed books for reference in this domain.

It was always his passion to also bring the latest in medical care to the Kongu region and he was instrumental in doing several first of its kind procedures in this region including intra operative angiogram and clipping of ACOM Aneurysm and epilepsy surgery in a rare condition called Mesial Temporal Lobe Sclerosis.

An astute administrator, he conceived and completed the 300 bedded Royal Care Super Speciality Hospital project in a record 400 days which is now a center of excellence in various specialities serving the people of Coimbatore region. Having accomplished his primary dream, he is now balancing time between active clinical practice and administration to complete this project at the earliest.

Under his able leadership, Royal Care has been instrumental to introduce several pioneering technologies, few of them even for the first time in the country to this region. And in the area of Neuro & Spine Surgery, Installation of the Kinevo 900 Microscope, first of its kind in entire India and at present available only at Royal Care, enables him to do complex Neuro surgical Tumour surgery with excellent results. He was also instrumental in the installation of the first intra operative synchronised imaging and navigation system in this region which aids performance of high precision Spine Surgery.

Nature and eco-conservation being close to his heart, his other dream in life is bringing Kongu region under green cover and rejuvenating the native rivers making this region nature surplus. Dedication to profession, contribution to society and philanthropy of this otherwise media shy and genuine Human being have been recognized on several occasions by people and organizations who have experienced his charisma.
